MEMORANDUM FOR THE RECORD

SUBJECT: PAR-225, "Microdensitometer Training Program"

[REDACTED]

1. The undersigned has discussed this program with [REDACTED]

[REDACTED], Chief, Technical Services Branch, TID, and with Messrs.

[REDACTED] also of TSB/TID. The consensus is that continuation of this program would not be of sufficient value to the government to justify the cost. [REDACTED]

[REDACTED] Plans and Development Staff have both stated that they did not learn anything of significance when they attended the training program. Instead, the [REDACTED] personnel seemed to be more interested in determining how our personnel used microdensitometers.

2. It is recommended that [REDACTED] be advised that we do not intend to have any more of our personnel trained under this program, and that PAR-225 is to be closed out.

[REDACTED]

Development Branch, P&DS
